

Profile

Enthusiastic and results-driven BCA graduate with expertise in Python-based full stack development, encompassing Django on the backend and React.js on the frontend. Deeply invested in the evolving AI landscape, consistently applying AI-powered tools to write smarter code and solve complex problems efficiently. Seeking a challenging role where innovation, learning, and impactful development go hand in hand.

Professional Experience

Python Full Stack Developer – Trainee

Code Pilot Institute – Sep 2025 to Mar 2026

- Completed Python Full Stack Development Course at Code Pilot Institute. .
- Learned frontend technologies including HTML, CSS, JavaScript, and React.js. .
- Worked on backend development using Python and Django framework.
- Gained knowledge in database management using MySQL.
- Developed responsive and user-friendly web application interfaces. .
- Improved problem-solving and debugging skills through practical tasks and mini projects
- Learned version control concepts using Git and GitHub for project management.
- Enhanced understanding of full stack web development concepts and real-world project workflows.

Projects

"SHOPZ " (E-COMMERCE WEBSITE) – MAY 2026

- SHOPZ is a full-stack e-commerce web application developed using ReactJS, Django REST API, and MySQL to sell tech gadgets like earbuds, power banks, headphones, watches, and pendrives. The project is deployed using Vercel, Render, and Clever Cloud.
- The project includes features such as product browsing, search, wishlist, cart, login/register, and checkout for a simple and user-friendly shopping experience.

"PORTFOLIO" – NOV 2025

- Developed a responsive personal portfolio website using HTML, CSS, and JavaScript to showcase skills, projects, and personal information.
- Designed clean user interface with responsive layouts and basic interactive features for better user experience.

"GUESS THE NUMBER GAME" – DEC 2025

- Developed an interactive Guess The Number game using HTML, CSS, and JavaScript with simple and responsive user interface.
- Implemented random number generation, score tracking, and user input validation to enhance gameplay experience.

Education
